

# Desktop Security

**Modern business depends heavily on computers. At the same time, criminals are constantly creating new ways to use the Internet for their illegal activities. In spite of these facts, businesses still lack an up-to-date security solution, which would protect their business environment. Many companies have limited resources and budgets for IT security, while their office environment is becoming increasingly mobile. This, along with the fact that targeted attacks are becoming more and more frequent, makes a fully automated security solution the best choice for a business.**

It is a smart choice to choose security as a service. In this way, you can concentrate on business without having to worry about IT security, security settings or software updates. Instead, you can leave security to professionals. Our Protection Service for Business in conjunction with F-Secure makes sure that threats from the Internet do not harm your business: your e-mail is working, e-commerce solutions are not disturbed and your confidential data is protected. In short, your business runs smoothly. No investments are needed for managing the security. Platinum and F-Secure maintain the whole solution. This means direct cost savings to you.

### Key Features

- Protection for laptops, desktops and file servers.
- Antivirus, antispyware, Internet shield, rootkit detection and protection against new, unknown threats.
- Built-in spam control makes sure that e-mail is free from junk mail and other unwanted messages.
- The automated features make sure that your operations work 24/7 with minimum intervention and IT resource use.
- Security updates and software upgrades are automatically delivered to your computers.
- Fully managed by Platinum and F-Secure

An online portal is used for managing and monitoring the security status and settings of your IT systems. Customers can also have access to this portal if required. Communication between protected devices, F-Secure servers and portal is encrypted and cannot be read by outsiders.
